Mammals

Birds

Fish

Reptiles

Amphibians

Key Skills

- I can identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals.
- I can describe and compare the structure of a variety of common animals.
- I can identify, name and sort animals that are herbivores, carnivores and omnivores.
- I can name and label the parts of the human body.
- I can name the five senses and to perform simple tests to find out more about them.
- I can sort animals according to a criteria.

Key Vocabulary

Amphibians: Amphibians live in the water as babies and on land as they grow older. They have smooth, slimy skin.

Birds: All birds have a beak, two legs, feathers and wings.

Fish: Fish live and breathe under water. They have scaly skin, fins to help them swim and they breathe through gills.

Mammals: Mammals are animals that breathe air, grow hair or fur and feed on their mother's milk as a baby.

Reptiles: All reptiles breathe air. They have scales on their skin.

Carnivore: Animals that mostly eat other animals (meat) are carnivores.

Herbivore: Animals that only eat plants are herbivores.

Omnivore: Animals that eat both plants and other animals are omnivores.

Sight: Your eyes let you see all the things around you.

Hearing: Your ears let you listen to all the things around you. Your brain is able to tell what different sounds are.

Touch: Your skin gives you the sense of touch. You can tell if something is warm, cold, smooth or rough without even looking at it!

Taste: Your sense of taste comes from your tongue. You can tell if something tastes bitter or sweet. You might have some tastes you like and some you don't.

Smell: You smell using your nose. Your nose can tell if things smell nice or not nice.
